## **AGI Group Continues Growth at South Greensburg Commons**

*Another 3-year commitment by local company that specializes in parts procurement, mobile device repair, and display enhancements.*

**South Greensburg Borough, Pa, March 27, 2014** – The Westmoreland County Industrial Development Corporation’s (WCIDC) Board of Directors – Charles W. Anderson, R. Tyler Courtney, and Ted Kopas today approved a 3-year lease extension with AGI Group, an industry leader in parts procurement, repair services, and display enhancements. The renewed lease includes 83,396 square-feet at South Greensburg Commons in South Greensburg, Westmoreland County.

With its corporate headquarters located at the facility in South Greensburg, AGI Group is a global company with offices in North America and Asia. AGI consists of 3 unique divisions; AG Parts, AG iRepair, and AG

Displays. Each division offers customers a wide variety of products and services such as parts and repairs for laptops and tablets, management of reverse logistics, recycling services, and providing solutions for custom display applications that require sunlight readability and night vision goggle (NVIS) compliance.

The company first moved its operations to the Commons facility (approximately 35,000 square feet) in 2006 along with 22 employees. “Since that time, we have more than doubled our space and tripled our employees,” said John Yetsconish, Executive Director AG iRepair. “One of the main reasons for AGI’s growth has been our partnerships with over 450 schools throughout the country, providing repair services for their 1:1 (1 device per student) deployments, including local schools such as Elizabeth Forward, Ligonier Valley, and Seton Hill University.”

The AGI Group will continue enhancing its performance of high-level screen repairs for educational systems, corporations, and repair facilities with the renewal of the 83,396 square feet for another 3 years. “By

partnering with school districts, we have strengthened our reputation as a leader in the industry by offering the highest quality repair services, proprietary software and systems, and an avenue for customers to reuse their devices and recycle the components they could not use”. “I’m really proud of our staff and our state-of-the-art technical facilities, which enable us to develop customized solutions to meet our customers’ constantly changing needs,” adds Yetsconish.

“AGI Group has been a staple in Westmoreland County for many years, and we appreciate their continued commitment to our county,” said County Commissioner Chuck Anderson.

Commissioner Anderson also serves as chairman of the county Industrial Development

Corporation. “This lease extension is another example of the great things going on in Westmoreland County.”

“The success of the South Greensburg Commons facility is a case- in-point of the county’s strong public/private partnership between the WCIDC and the Economic Growth Connection of Westmoreland (EGC) utilizing the advantages of our agency’s resources,” said Jason Rigone, Executive Director of the WCIDC.

AGI occupies space in the building along with Phillips Respironics and Forest Hills Transfer and Storage.
