

Find the providers and costs that work for you.

Our easy-to-use online tool helps you take control of your health care in one place.

Find the Right Providers

We'll show you which providers and facilities are in-network for your plan, to help you save money and avoid higher out-of-pocket costs. Everything from primary care doctors and specialists to hospitals, imaging centers, urgent care centers, and more, including:

- Contact information and distance
- Board certifications
- Blue Distinction® Centers
- Physician quality measures, like awards and recognitions

You can also download your search results and print out details about the doctors.

Estimate Your Costs

Our Care Cost Estimator helps you find the best value for medical procedures. This tool starts with the total procedure cost, and then figures in the amounts you're currently responsible for — things like your remaining deductible, copays and coinsurance, and benefit maximums — so that the estimated cost is as accurate as possible.

Read Patient Reviews

Patient Experience Review ratings show other patients' opinions about their experiences with providers. You can search by star ratings and then rate your own experiences, just like with restaurants and movies.

Log in at highmarkbcbs.com and select **Find a Doctor** to start your search.
